

Claudia Wimmer

Product & UX Leader · Conversational AI · Enterprise Stakeholder & Vendor Management

Munich, Germany | clwimmer@web.de | [LinkedIn](#)

SUMMARY

Product and experience leader with 10+ years at the BMW Group, now heading the UI/UX practice for BMW's Intelligent Personal AI Assistant, personalization (BMW ID), and the MyBMW and MINI apps. My work combines hands-on conversational and voice AI design with the supplier and stakeholder management that gets complex programmes shipped: I brought Amazon's and Cerence's voice stacks into BMW vehicles and led the teams that took them to market. I lead and coach cross-functional teams and work closely with Product, Engineering, Sales and enterprise customers. Native German, business-fluent English.

EXPERIENCE

Practice Lead, UI/UX — BMW Group

Feb 2025 – Present

Intelligent Personal AI Assistant · Personalization / BMW ID · Customer Onboarding · MyBMW App & MINI App

- Lead and coach a 17-person design team across BMW's AI assistant, personalization and mobile apps, with full disciplinary responsibility and a €4M budget.
- Direct the team's conversational-AI design craft: interaction logic, guardrailing, character, tone of voice and persona definition, voice casting, voice-UI guidelines, in-vehicle dialogue modeling, AI visualization, and preference and function automation.
- Define the customer experience for agentic and generative AI, and own the "AI at UI" CX strategy: how the car's interface must adapt as AI reshapes in-car interaction.
- Led the UX for BMW's upgraded Intelligent Personal Assistant, now built on Amazon's Alexa+ generative AI. It launched in the all-electric BMW iX3 (2026) in English and German, replacing rigid voice commands with natural conversation.
- Own the user experience for the MyBMW and MINI apps (15 million users) and for personalized onboarding into the new car, aligning Product, Engineering and brand stakeholders behind one roadmap.
- Run DesignOps for the practice: design sprints, shared ways of working, playbooks and team wellbeing that help the UX community deliver faster and more consistently.

Product Owner / Programme Manager, Intelligent Personal Assistant — BMW Group

Jun 2022 – Feb 2025

In-car conversational & voice AI assistant

- Owned the product and programme for BMW's in-car Intelligent Personal Assistant, now live in around 8 million registered vehicles worldwide. Coordinated teams across Product, Engineering and external vendors.
- Managed the strategic supplier relationships with Amazon and Cerence as executive point of contact. Negotiated scope, governed delivery, and integrated and customized their voice AI stacks into the BMW platform.
- Navigated complex escalations and aligned senior business and engineering stakeholders to keep multi-year delivery on track and on budget.
- Built the roadmap and requirements from customer and market feedback, and rolled out new voice features across markets.

Strategy Manager, Digital Car — BMW Group

Mar 2021 – Jul 2022

- Led cross-divisional strategy projects and rolled out an agile operating model across teams, which sped up decisions and improved delivery transparency.
- Led organizational development that introduced new ways of working and cross-team collaboration standards.

Product Owner, On-Demand Mobility (Car Sharing) — BMW Group, Mobility Services Oct 2015 – Mar 2021

- Owned “Keyless Fleet Solutions,” a B2B platform that helped enterprise fleet customers and operators (including SHARE NOW and SIXT) optimize rental processes and fleet efficiency.
- Led the “Fastlane” redesign of the rental flow between the DriveNow app and the car. It cut interaction-step time from 50 to 4 seconds (–92%) and won the BMW Quality Award 2018.
- Directed the technical migration of the DriveNow fleet into the car2go (SHARE NOW) platform and delivered every market launch on time with the agreed premium feature scope.
- Adapted the on-demand mobility platform for car rental and launched it with enterprise customer SIXT in August 2019.

Earlier experience

2012 – 2015

- Intern & Master’s Thesis, Product Management Car Sharing, **BMW Group**. Defined and prioritized business requirements with engineering and customers (thesis grade 1.3).
- Working Student, Research & Competitive Analysis, **Bain & Company**; and Project Assistance, **PACT AG** (managing the **Samsung Electronics** trainer pool).
